

PHOTONEMO

Customization Guide

Photo frames / AI images / Booth exterior / Start screen

See examples of event-branded photo frames, AI images, booth exteriors and start screens. Prepare your artwork with this guide.

Examples focus on the standard color booth.
Confirm the final setup for your model and event with our team.

Illustrations include Korean demo UI and event artwork.

English captions explain each example.

Contents

1. Photo frames	Six layouts, selection tips and examples
2. AI image settings	Background choices and image combinations
3. Booth exterior	Design areas and installation examples
4. Start screen	Design areas, required information and examples
5. Event signage	Signage examples and print preparation
6. Guest experience	Program steps and Korean demo screens

STEP 1. Choose your photo frame

Choose a color-booth layout for your event concept and group size.

For a menu of frame choices, **we recommend four or fewer** . The B&W Mini prints one photo per layout.

Layout	Features	Best for
Landscape 1	4 photos + logo on the right	Group photos
Landscape 2	2 photos + logo on the left	Short sessions, such as weddings
★ Landscape 3	1 + 3 photos + logo below	Featuring an AI portrait

A larger photo area helps show the detail in an AI portrait.

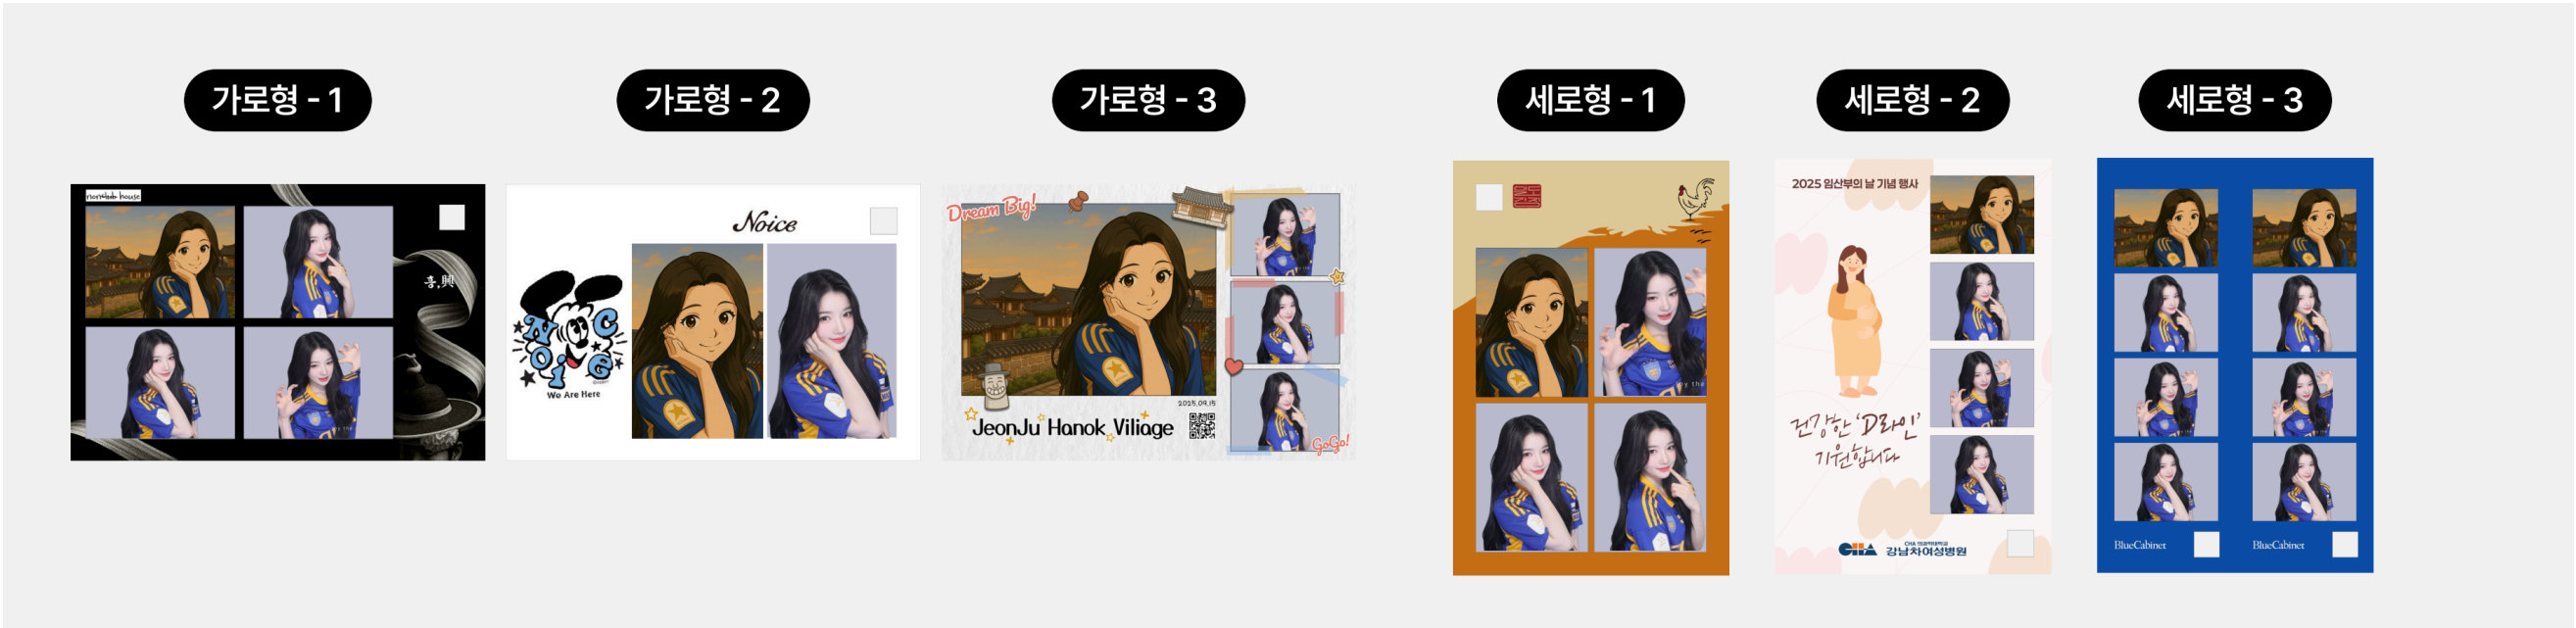

Layout	Features	Best for
Portrait 1	4 photos + logo above	Individuals and small groups
Portrait 2	4 photos + logo on the left	Highlighting a logo or message
Portrait 3	4 photos printed as 2 strips	Events where guests split the print

STEP 1. Frame customization examples

Frame designs used at previous events.

Apply your colors, logos and wording to a layout. Discuss changes to photo placement with our team.

Preparation notes

- Photo positions and sizes can be adjusted. We review the revised layout together before use.
- Add event logos, wording, dates and sponsor logos.
- Submit PNG, PSD or AI artwork using the supplied template. Keep photo and QR areas transparent in PNG files.
- Send the final approved frame at least 3 business days before your event.
- Applying finished artwork and commissioning design are separate services. Design, exterior fabrication and installation are quoted separately.

STEP 2. Configure AI images

Combine an original photo with AI results, or use AI images in multiple photo slots.

Plan the number of converted photos and the print layout together. Processing time depends on photo count, style and the event network.

1

AI 캐릭터 + 단색 배경

배경이 제거된 뒤, 단색 컬러로 대체 됩니다.

2

AI 캐릭터 변환 + 실사 사진 속 배경

실제 촬영된 장소 배경 위에 인물만 AI로 변환됩니다.

3

PHOTO NEMO

AI 캐릭터 변환+ 새로운 이미지 파일

원하는 이미지나 명소 사진으로 배경을 교체할 수 있습니다.

Illustrations 1-3: replace the original background with a solid color; retain the photographic background; or place the portrait over a new background image.

Preparation notes

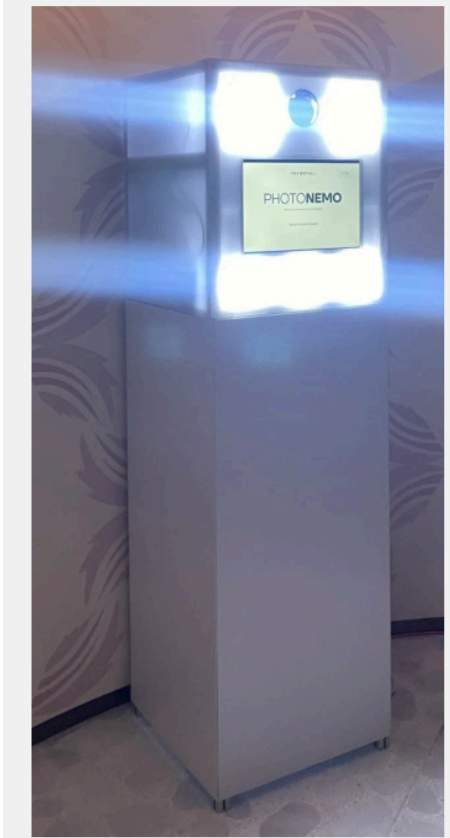

- The 1 + 3 layout with one large AI image is a starting example. Discuss layouts with multiple AI images with our team.
- AI image positions follow the approved frame layout. When using several frames, confirm image counts and styles for each.
- Portrait style and background composition can be selected independently. Confirm the background assets and choices during consultation.

STEP 3. Customize the booth exterior

Customize the booth exterior to match your event concept.

Check the available design areas and preparation notes.

Our team supplies a template for your selected model and branding scope.

Preparation notes

- Without exterior customization, the standard front is plain white.
- Front, back and side surfaces can be customized as needed.

[Detailed exterior wrapping guide \(Korean\)](#) · Design areas for your selected model

STEP 4. Design the start screen

Brand the first screen guests see when they approach the booth.

Use your logo, wording and background colors.

Item	Specification
Resolution	1920 × 1200 (14-inch screen)
Required information	For free-photo events: explain that photos are free and say “Touch to start”.
Design areas	Background, wording, logos and colors outside the required information areas
File formats	PNG / PSD / JPG (RGB, 300 dpi)
Submission deadline	At least 3 business days before the event

Preparation notes

- The default is a white background with the PHOTONEMO logo.
- Use the supplied template for your custom artwork.

Keep the instructions and start action easy to recognize. This Korean demo shows the default screen for a free-photo event.

STEP 5. Design event signage

Use signage for queue direction, booth instructions and your event message.

These examples use A3 signage. Design it to match your event concept.

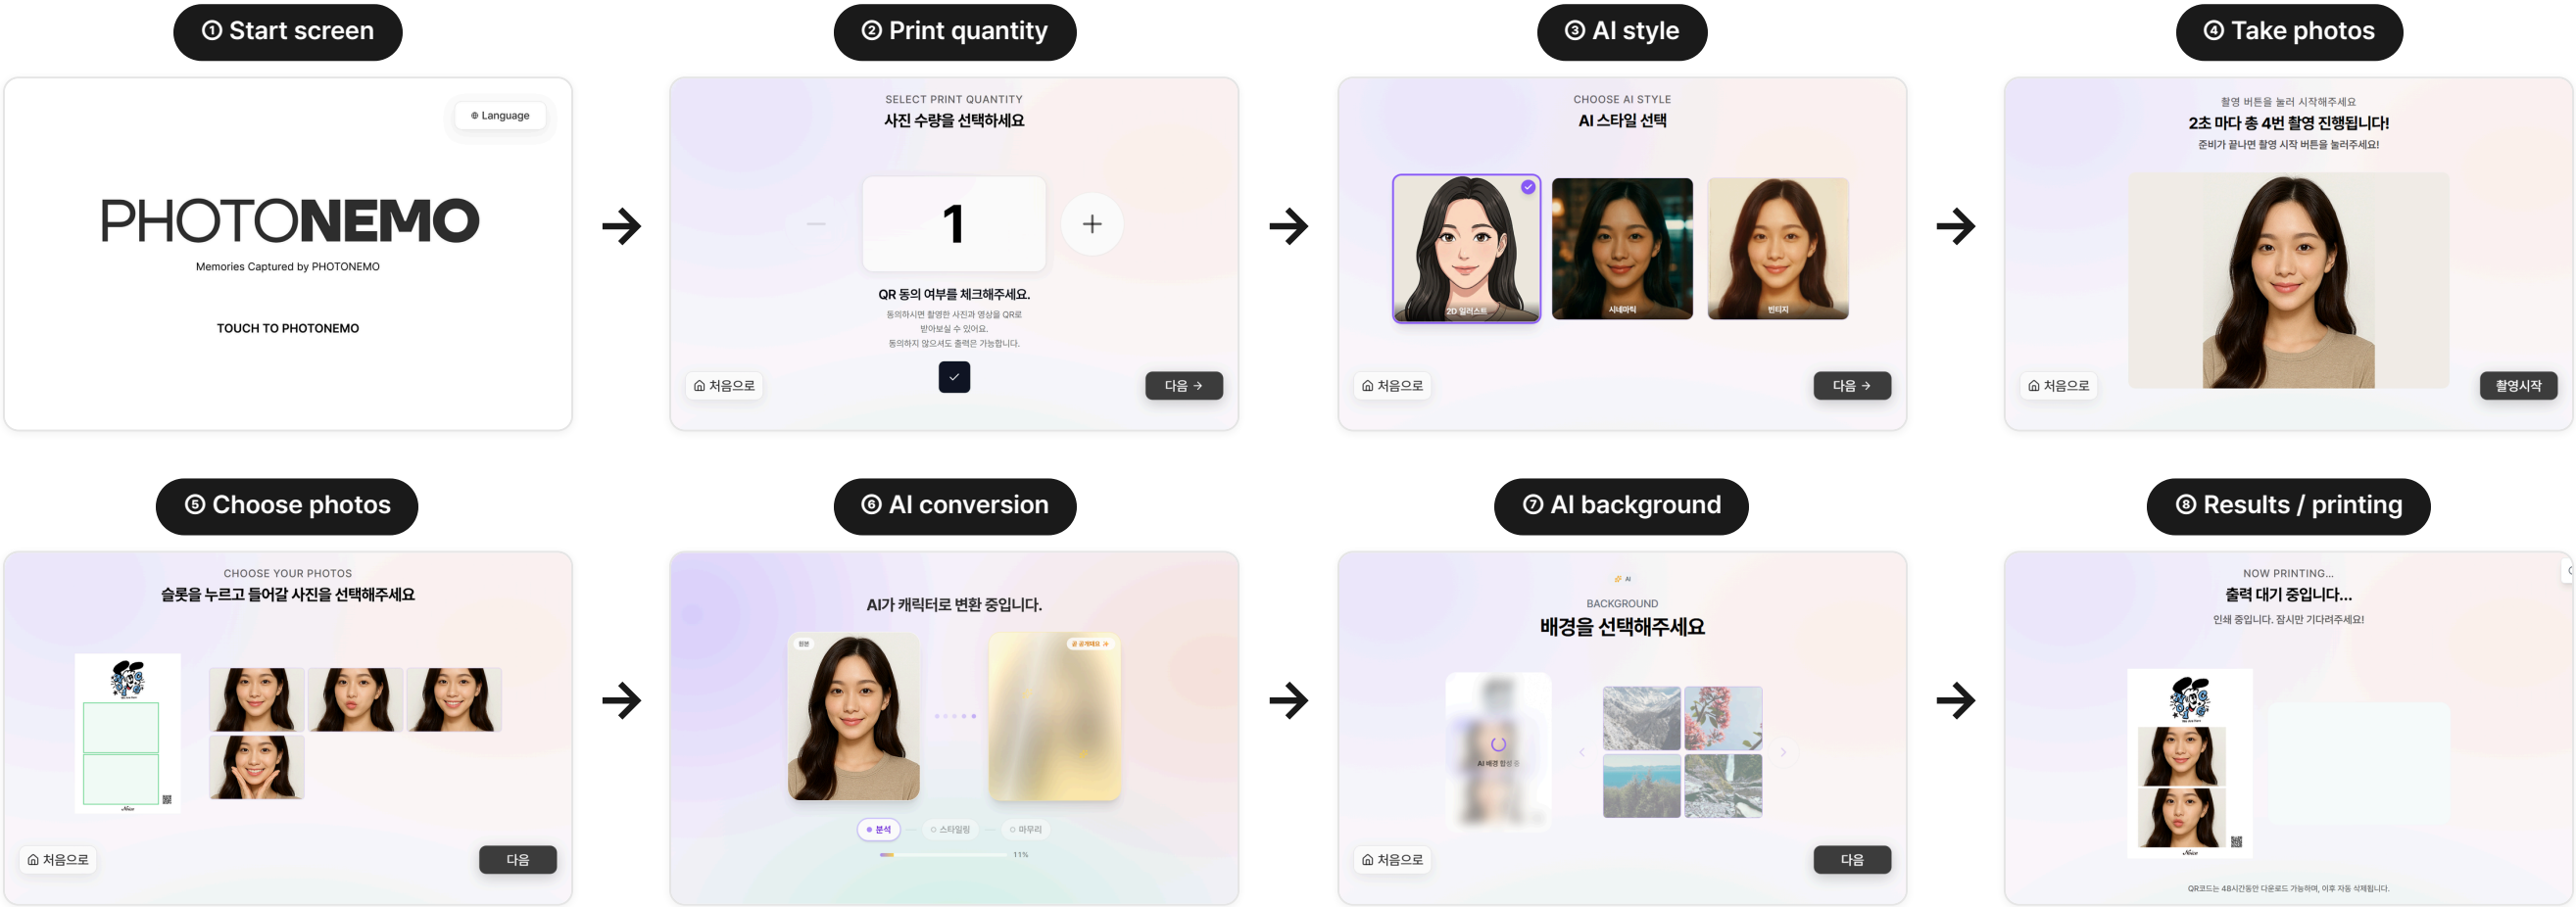

Preparation notes

- Use high-contrast text colors for readable prints.
- Submit print artwork as PDF or PNG.
- We recommend a 5 mm print margin.

STEP 6. Explore the guest experience

These Korean demo screens show portrait style conversion and background selection.

Guests select an **AI style** before taking photos. The displayed steps depend on your enabled features and operating setup.

Compared with the November 2025 version, **AI style selection now comes before taking photos**. Some steps appear or are skipped depending on portrait and background AI settings. Multiple registered frames add a frame-selection step. A fixed print quantity can skip quantity selection.
